---

Dean,

On October 4th a man was working on one of the towers. There are 3 witnesses that can verify this. In the August issue of the TDXS newsletter [www.TDXS.net](http://www.TDXS.net) Tom Taormina says that "...he must get retroactive permits for all existing towers! This even precludes maintenance and repair of existing installations!"

My questions to you are: Is the stop work order still in effect? If it is still in effect, wouldn't a permit need to be drawn for work on these towers? Was he given permission to work on the towers? Can you verify the structural integrity of these towers? I spoke to you about this before and never heard anything back. I have attached a picture of the man on the tower.

Thanks,

Michelle Adkins
